

Total calm,

depth & effectiveness with the best anesthetic agent

Lidocaine as an active ingredient, is the best anesthetic agent & the **most widely used worldwide**.

The epinephrine vasoconstrictor present in our anesthetic **reduces systemic toxicity by hemorrhage**.

The piston has a special lubricant to guarantee **optimum sliding**, thus avoiding trauma during application of the anesthetic.

Our product strictly complies with all the manufacturing rules & regulations & **ISO 9002 Quality Assurance** standards to guarantee your total security.

RegistrationNo. **MAL20051327A**

LIDOCAINE E-80 2% - injectable solution with Vasoconstrictor

New Stetic

7 Good Reasons

to Choose & Use Lidocaine % E-80 For Your Patients:

1 **Worldwide Recognition**

- ✓ Registered and used in 14 countries (including Malaysia) all around the world.

2 **Established Track Record & Drug Safety Profile**

- ✓ Lidocaine was first synthesized and used in 1943 by Swede chemist, Nils Løfgren.
- ✓ 63 years of history of pain control in dentistry worldwide. Proven effectiveness and safety profile.

3 **Special Lubricated Piston**

- ✓ The piston is made of natural rubber with coating of Silicone USP to guarantee optimum sliding. Hence, easy to use and helps to avoid trauma during application.

4 **High Lipophilicity**

- ✓ Increased lipid solubility permits the anesthetic to penetrate the nerve membrane, which itself is 90 % lipid (Malamed 1997), more easily.

5 **Nationwide Recognition**

- ✓ More than 5000 boxes sold to dentists all over Malaysia in less than 1 year.

6 **Very Competitive Pricing**

- ✓ Very attractive offer.
- ✓ Current ongoing offers: **10+2** or **20+6**, which translate to the lowest price of RM0.83/cartridge.

7 **Appropriate Dosage Form**

- ✓ Recommended dosage for Lidocaine 2%:
Infiltration – 1 to 2mL ; Block – 1.5 to 5mL
- ✓ This means more precise dosing and less wastage with Lidocaine 2% E-80.
